

Caltrans District 9 Bicycle Guide

SR 168

Description:

SR 168 is composed of two distinct alignments which are separated by a 15 mile gap along US 395. The western alignment begins at Lake Sabrina and leaves Bishop Creek Canyon where it drops 5,000 feet in elevation until it connects with US 395 in the City of Bishop. The eastern alignment begins at its junction with US 395 in the town of Big Pine and ascends 3,000 feet through a mountainous grade. It eventually terminates at SR 266 near the state border. There is light traffic on SR 168 excluding the area through the City of Bishop. The majority of the route functions as a 2-lane conventional highway with narrow shoulders except for the segment passing through Bishop which varies from 2-lane to 4-lane conventional highway. A Class III (Bike Route) facility is available west of Bishop.
